

CLAIMS:

1. An electronic surface mount package comprising:  
a one piece construction package having an open  
bottom,  
one or more toroid transformers carried within said  
package, said toroid transformers each having wires wrapped  
thereon,  
one or more terminal pins molded within said  
package, each of said pins having a notched post upon which  
said wires from said transformers are wrapped thereon,  
respectively.
